roofer mistake

YESTERDAY'S SETTING ISN'T TODAY'S

WELDING ROOF SEAMS IN THE COLD

THE MISTAKE

SAME WELDER SETTING AS YESTERDAY.

what changes the weld

THE COLD

and the wind, the sheet
and how fast it moves

WHY IT MATTERS?

A COLD WELD CAN LOOK FINE AT FIRST.

... and come apart later

how we do it?

TEST WELD FIRST

check it, then weld the roof

(common sense isn't common)
