

MYTH BUSTERS

*“a new roof will fix
MY DRAINAGE”*

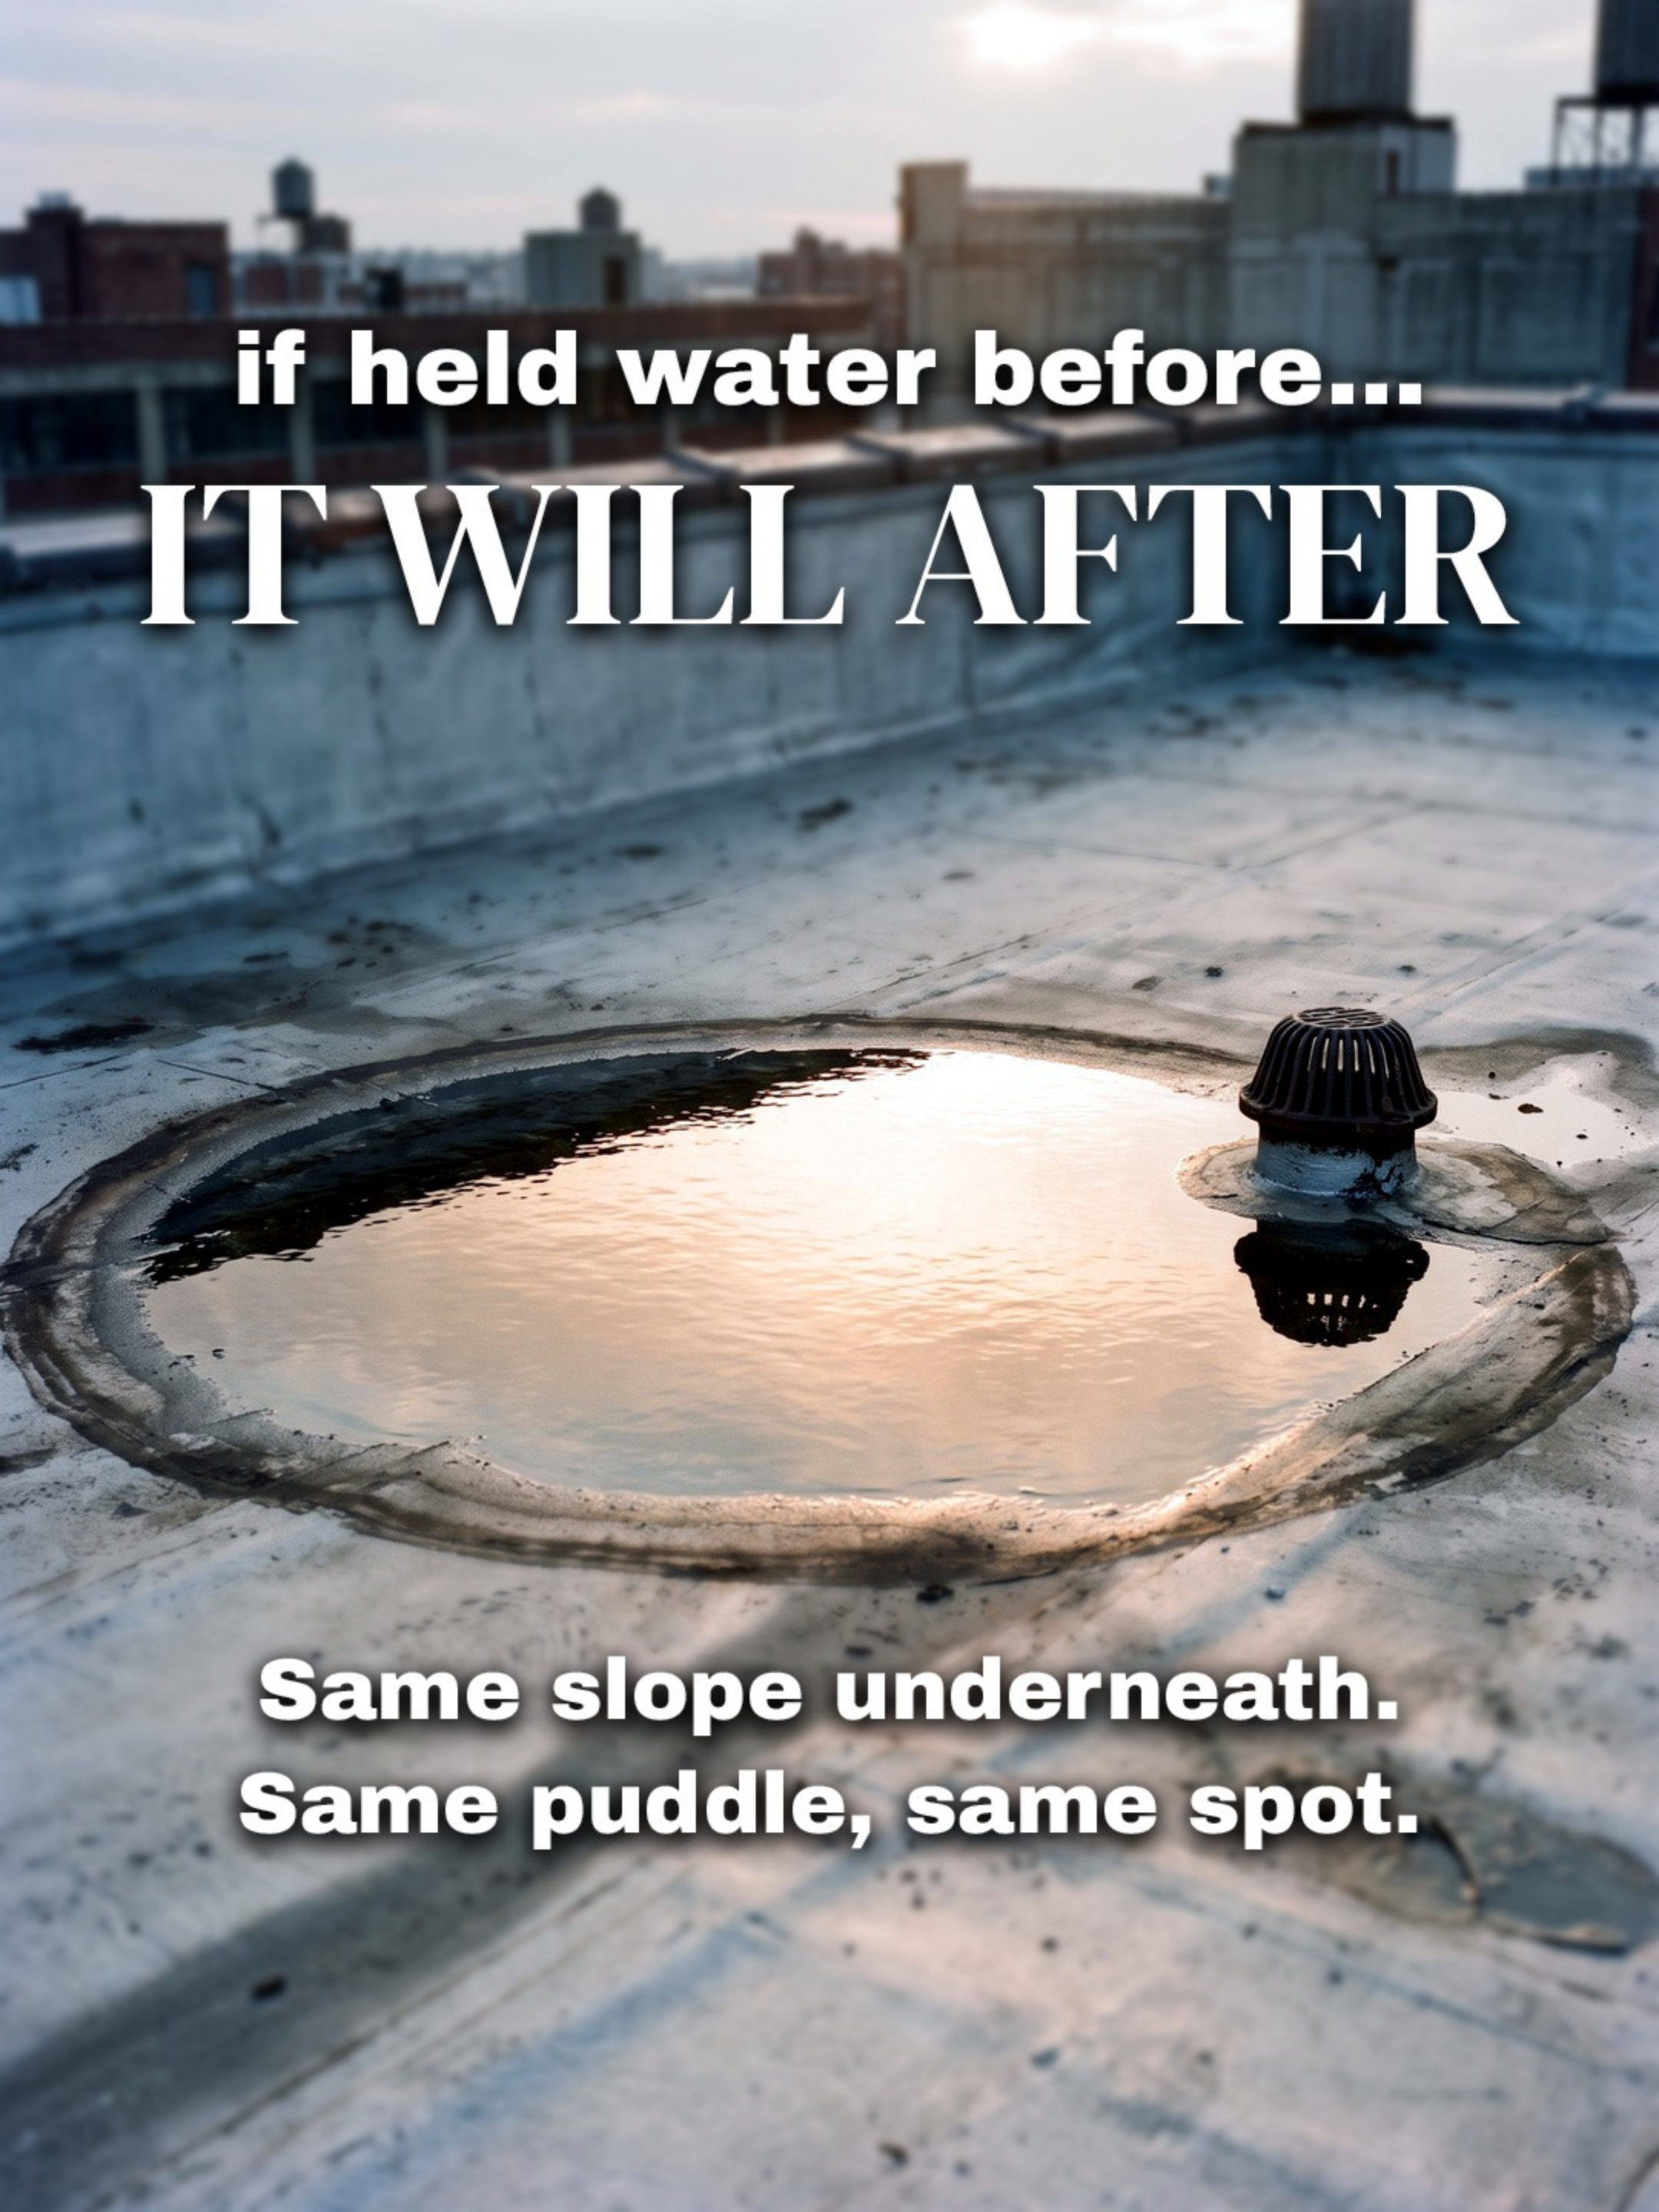

NO

a new roof *KEEPS*
WATER OUT

**It doesn't change
which way the water runs.**

A rooftop scene at sunset. A large, dark puddle of water is in the foreground, reflecting the bright orange and yellow light of the setting sun. To the right of the puddle is a black, ribbed drain cap. The background shows a city skyline with various buildings under a hazy sky. The overall tone is somber and reflective.

if held water before...
IT WILL AFTER

Same slope underneath.
Same puddle, same spot.

A photograph of two construction workers on a sloped roof. One worker in a bright yellow shirt is on the left, and another in an orange shirt is on the right, both kneeling and working on the roof surface. A large roll of white insulation is in the foreground. The background shows a residential neighborhood with houses and trees under a clear blue sky.

**the slope has to be
BUILT IN**

**Insulation cut on a slope, or
drains that get added or moved.**

what you need to know is

**A new roof and
better drainage
are two different
jobs.**
