

SEEN ONE OF THESE?

THE STAIN ISN'T THE LEAK

A photograph of a rooftop at dusk or dawn. A large, shallow puddle of water is spread across the dark, textured surface of the roof. In the center-right of the puddle, there is a black, circular drain cover with a grid pattern. The water reflects the ambient light, creating a shimmering effect. In the background, a building with a window and a metal vent pipe are visible.

WHAT WATER DOES

WATER TRAVELS

It gets in up top, runs along the deck, and soaks the insulation. It drips where it finds an opening. That can be a long way from the hole.

WHERE IT GETS IN

SEAMS

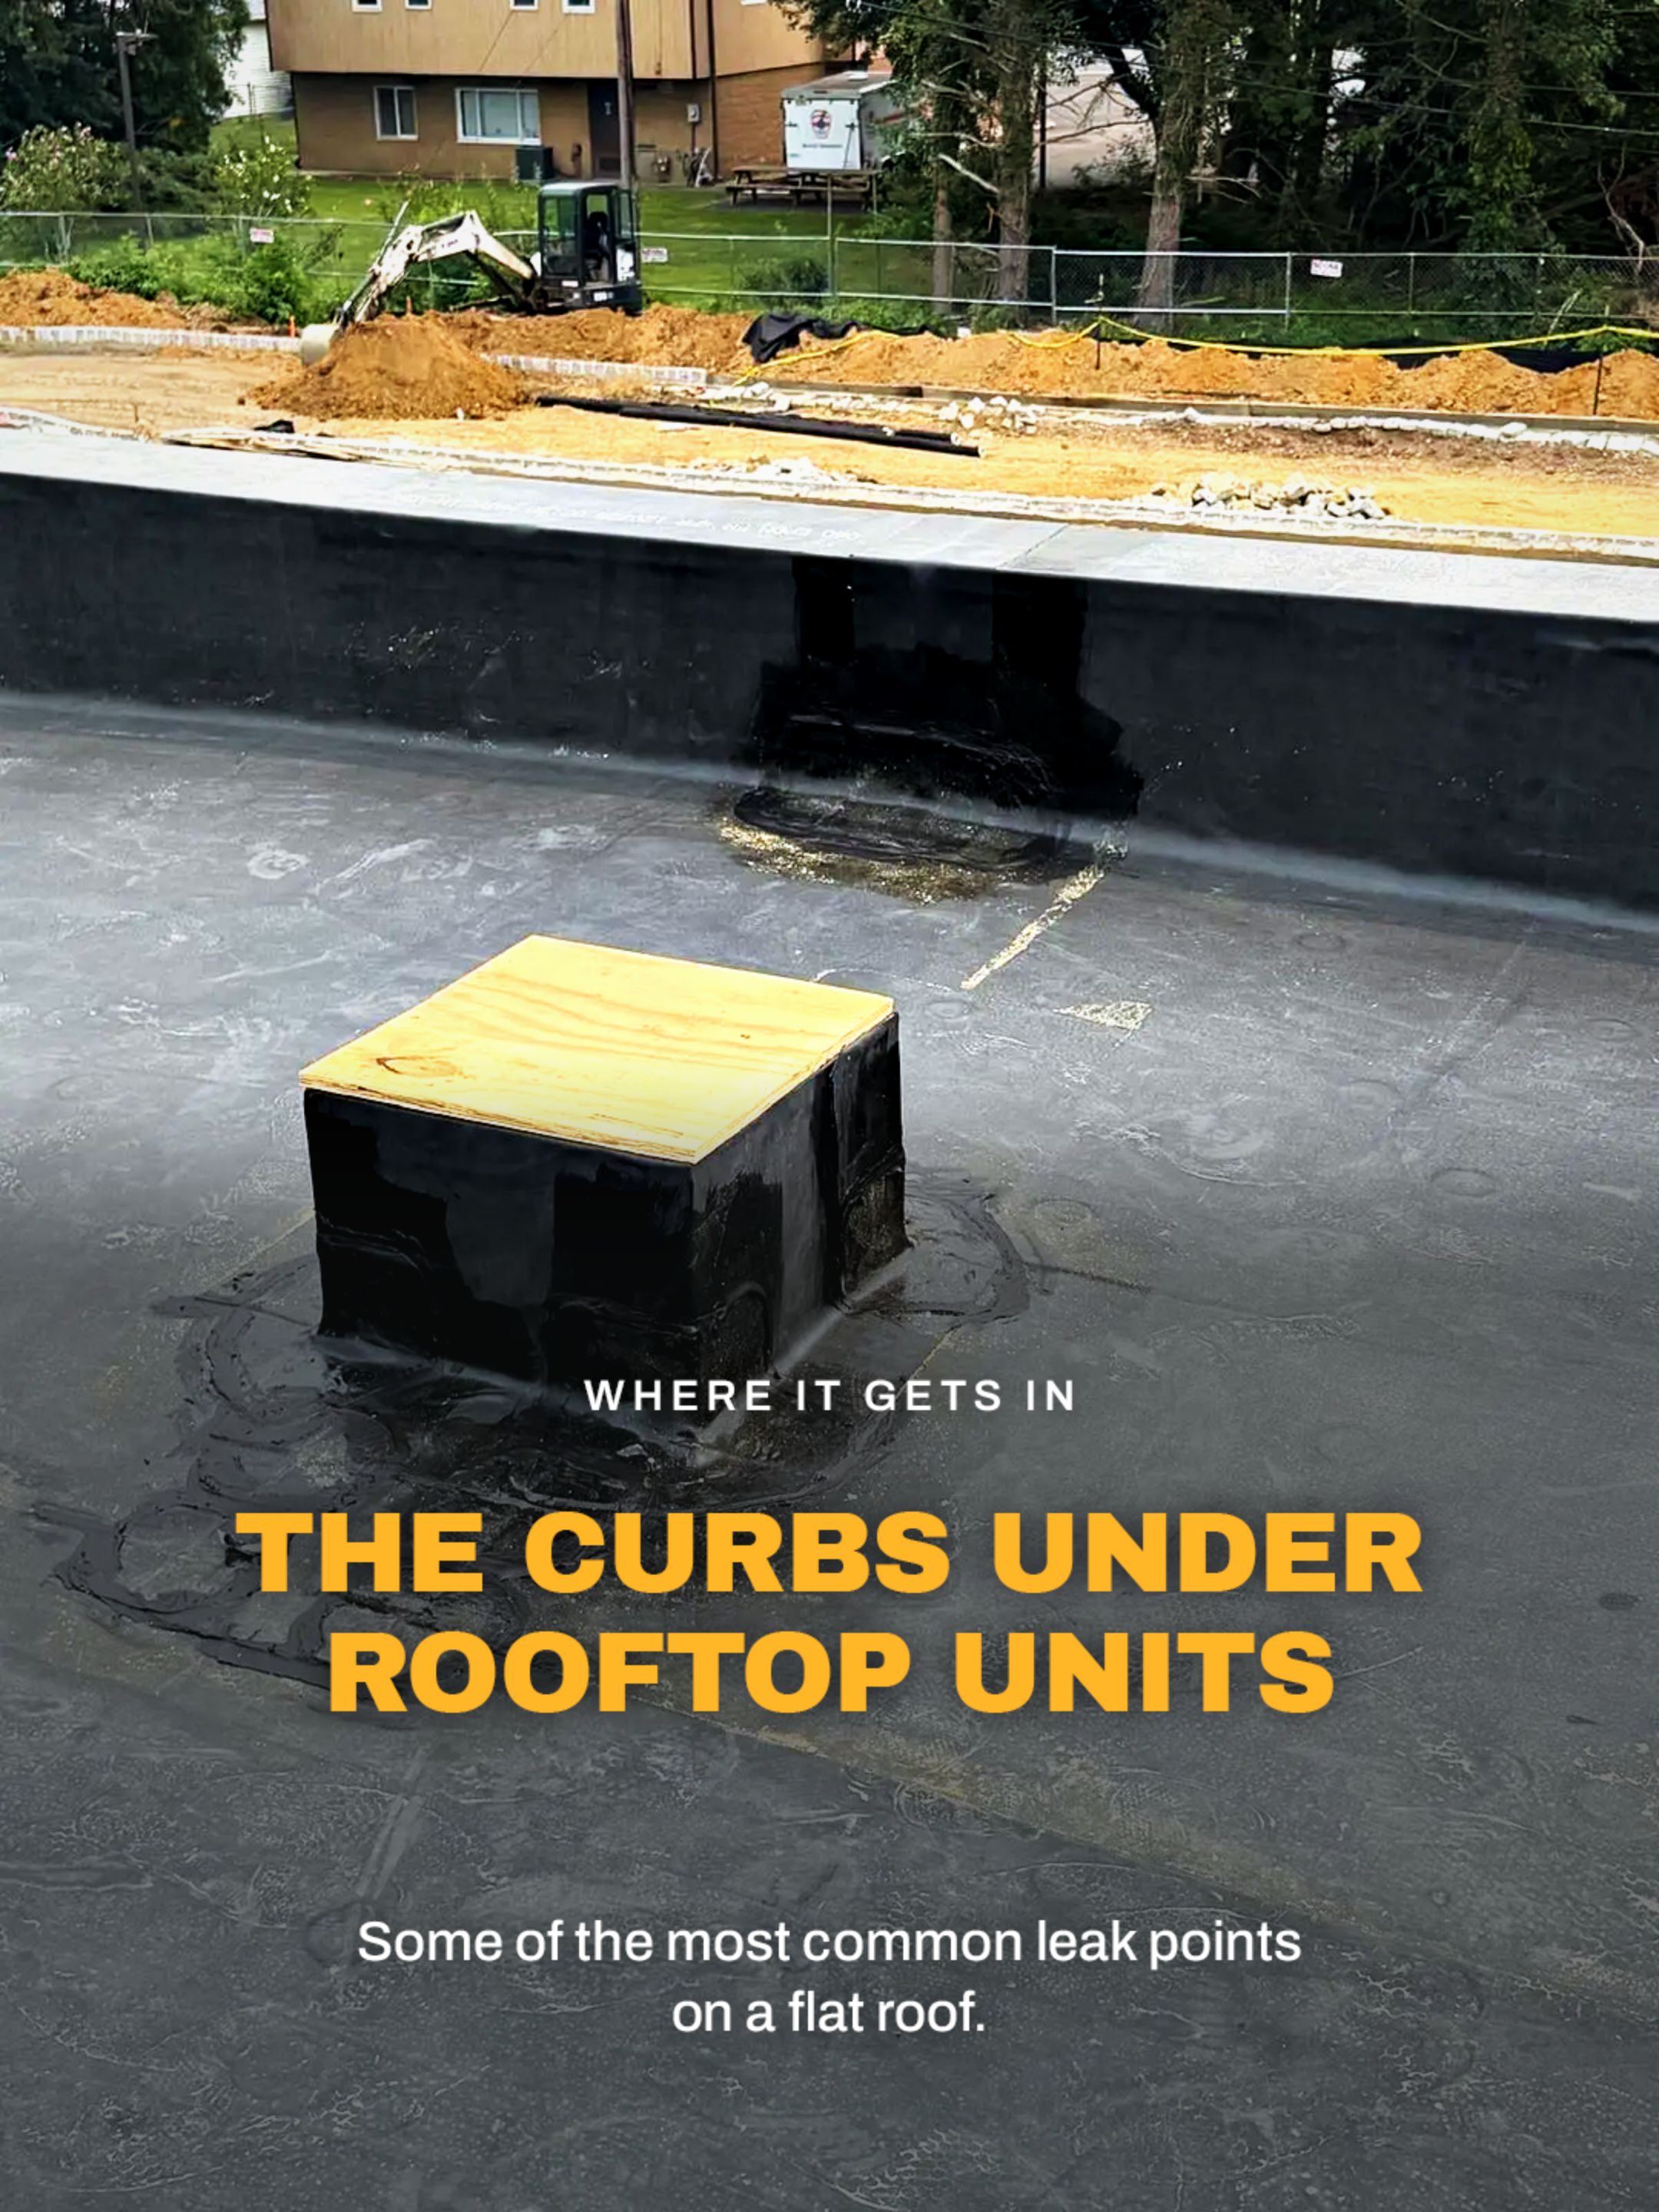

The repair we make most.

WHERE IT GETS IN

FLASHING

Where the roof turns up a wall
or wraps a pipe.

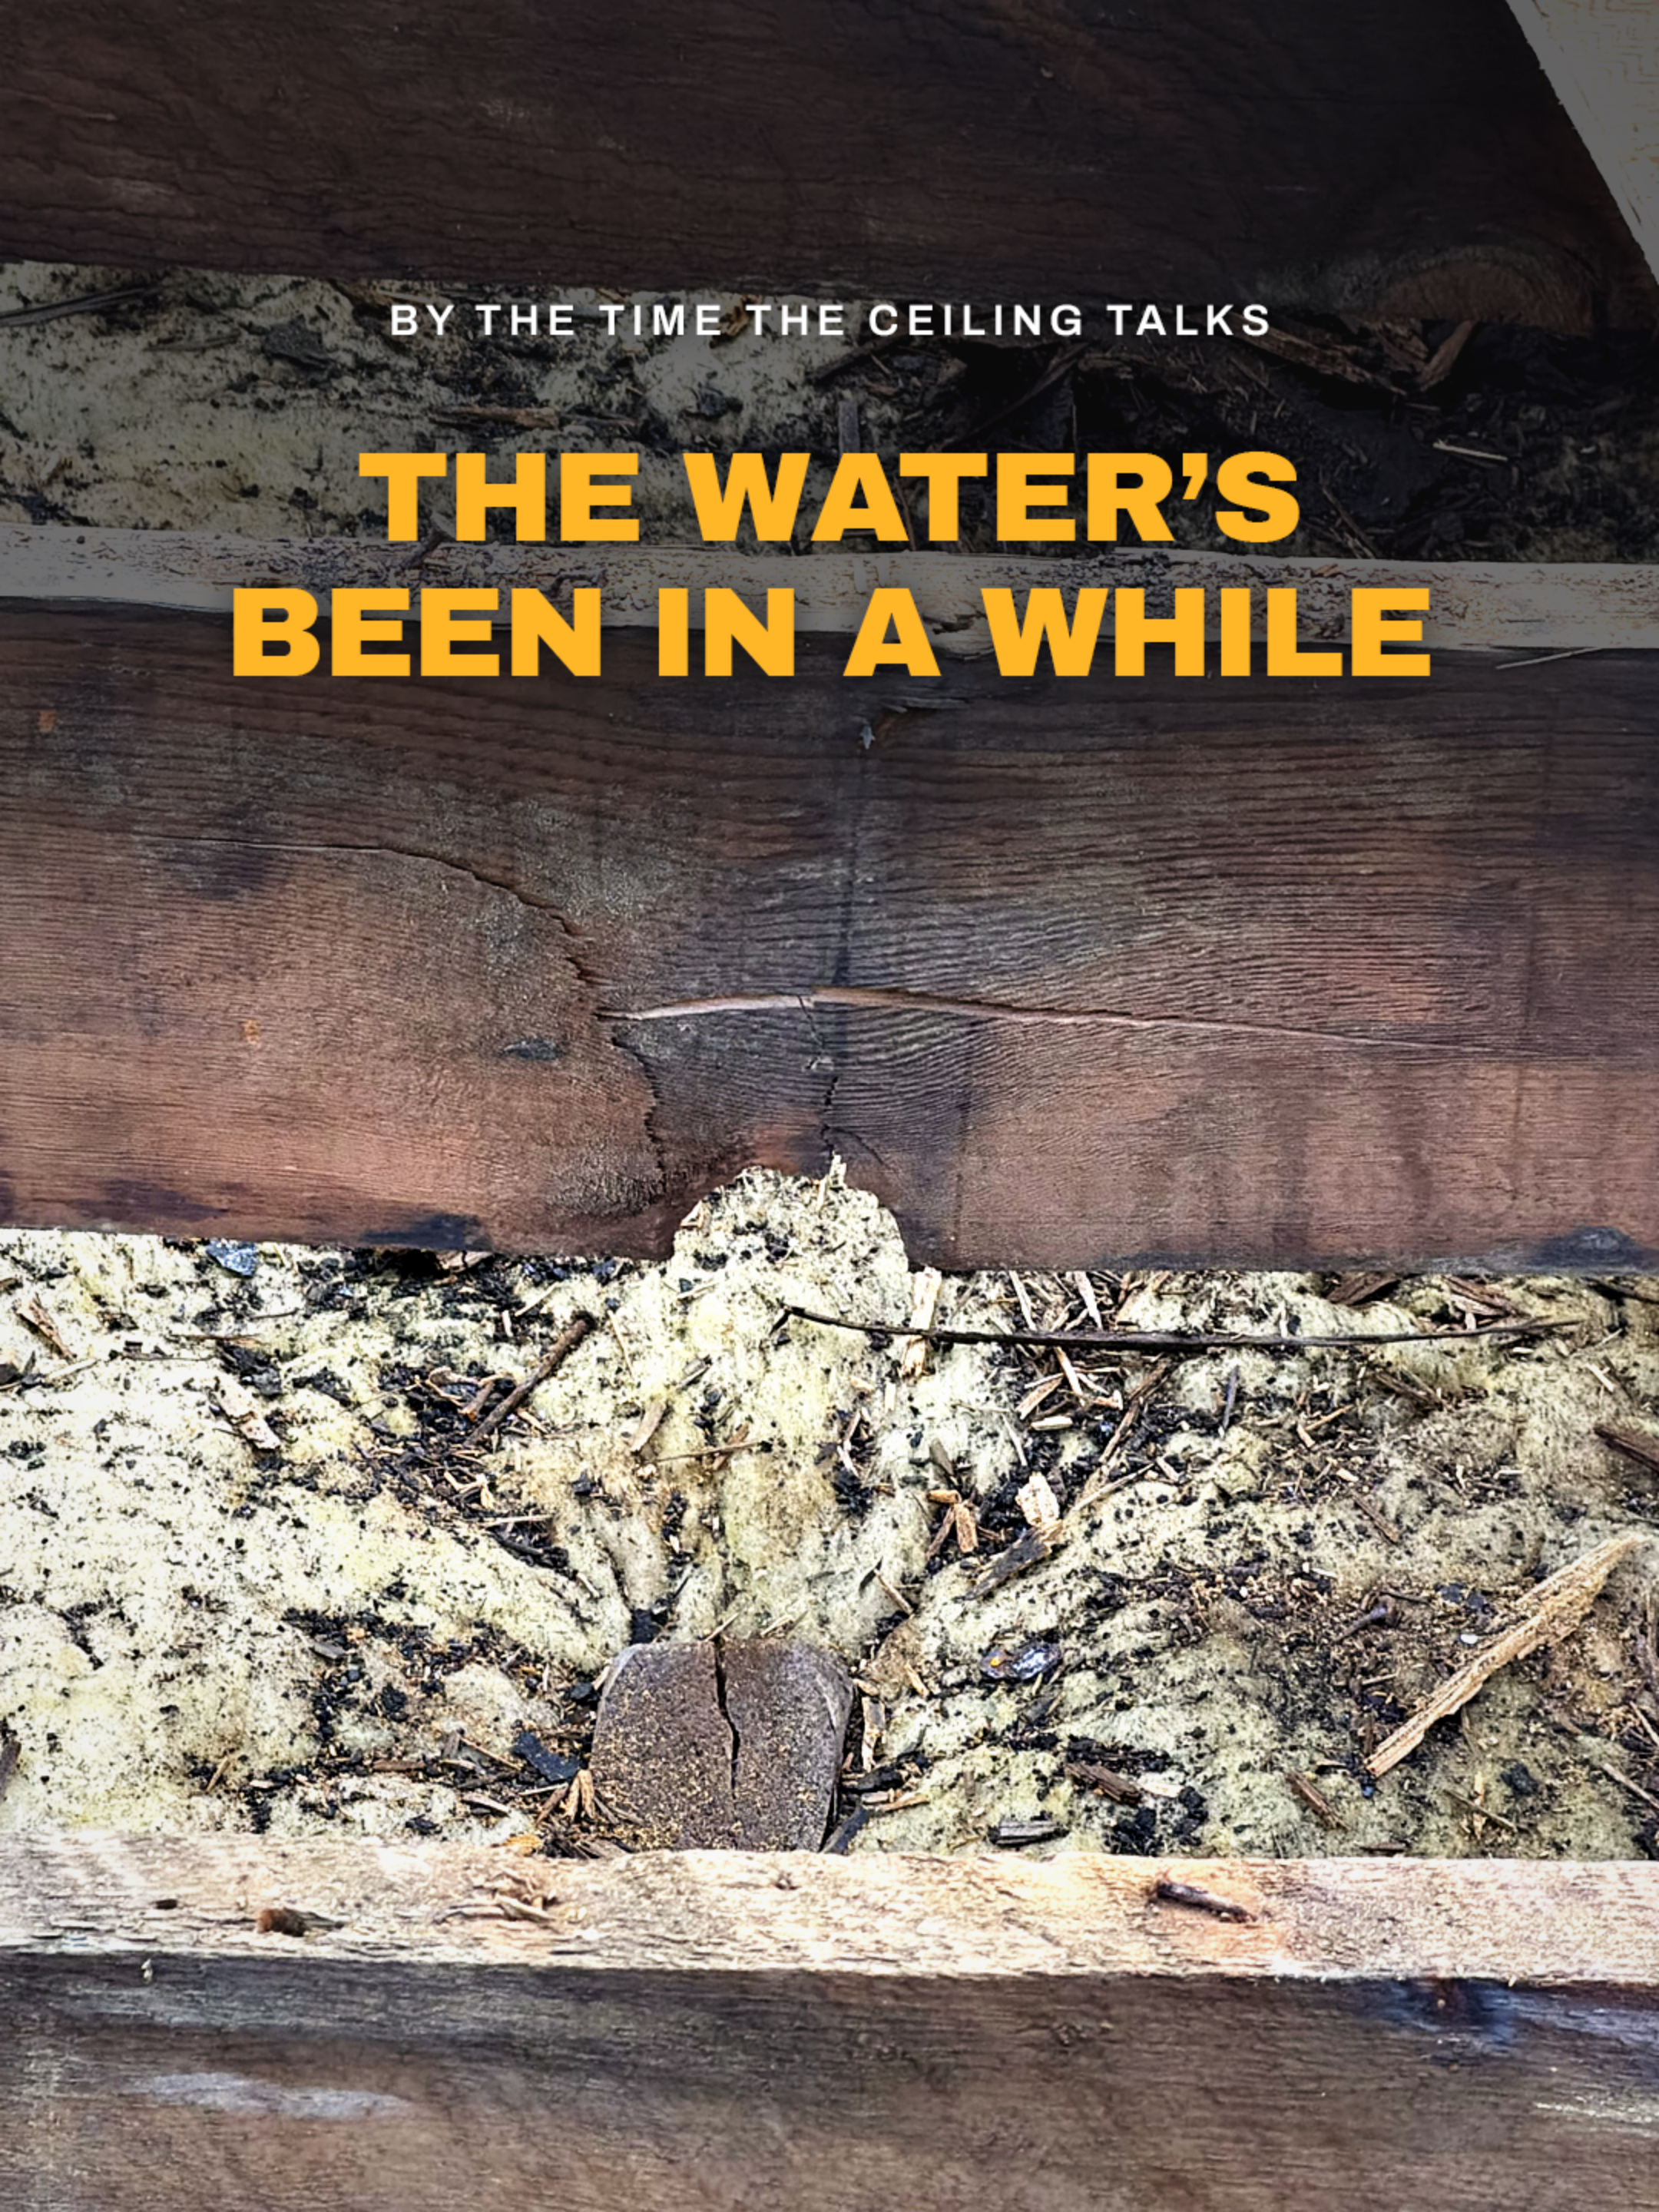

WHERE IT GETS IN

THE CURBS UNDER ROOFTOP UNITS

Some of the most common leak points
on a flat roof.
